

# Space Idioms and Phrases

1

## launch (noun and verb)

Start or set something in motion or introduce it to the public for the first time.

*The Saturn V spacecraft launched from Florida.  
Apple launched the newest line of iPhones last week.  
We're getting ready for the launch.*

2

## eclipse (noun and verb)

Obscure the light from or to another celestial body or deprive someone or something of power and importance.

*There won't be another lunar eclipse like this for a hundred years.  
The moon eclipsed the Sun.  
The director's resignation eclipsed the success of our project.*

3

## Houston, we have a problem

'Houston' refers to the NASA command centre located in Houston, TX. This phrase was uttered by the Apollo 13 crew when they discovered their launch didn't go according to plan. Nowadays, we use it to announce an issue or error to others.

*Houston, we have a problem. I can't see the sales data from July anywhere.  
Houston, we have a problem; I missed my bus and will be late.*

4

## the eagle has landed

This is another phrase that originates in the Apollo space missions to the moon. This time it was uttered by Neil Armstrong after landing the Lunar Module Eagle in the Sea of Tranquility on the moon. Nowadays, it's used for announcing the arrival, or successful completion of a mission or task.

*The eagle has landed. We can finish up and leave.  
The eagle has landed. I'll be home in twenty minutes.*

5

## shoot/reach for the stars

This phrase describes trying to achieve something particularly difficult or even unachievable. The meaning comes from the fact that we can't really reach another solar system with another star.

*My mother always told me I could do anything and shoot for the stars.  
Our budget for next year is much higher than we expected. We can reach for the stars.*

# Space Idioms and Phrases

6

## once in a blue moon

'Once in a blue moon' means very rarely and comes from the term for an additional full moon in a year. Most years have twelve full moons, but there are thirteen every two to three years. Blue moon refers to the third full moon in a season with four full moons. The term is used to keep the timing of full moons regular, similar to the reason for leap days.

*Growing up, we only had ice cream once in a blue moon.  
I see my cousins once in a blue moon.*

7

## come back down to earth

Be more realistic.

*It's a nice idea, but I think you need to come back down to earth a bit.  
She'll come down to earth once she thinks about it.*

8

## be over the moon

Be ecstatic or very happy.

*She'll be over the moon when she hears about it.  
I was over the moon when I passed my last exam.*

9

## space out

Daydream or stop paying attention.

*I have no idea what the teacher asked; I spaced out.  
Many people space out in front of their TV every evening.*

10

## it's not rocket science

It's not difficult or complicated.

*It's not rocket science, and I'm sure I can figure it out.  
I know it's not rocket science, but I still don't understand it.*
